Centrul FILIA is a feminist organization that makes women's voices heard through direct work in communities and advocacy activities, activism, awareness, studies, and analysis.

We want a solidary society in which the rights and diverse needs of women are respected and which offers equal opportunities to all people.

THE YEAR 2021 IN NUMBERS:

Approximately 2,300 beneficiaries

350 hygiene packs (pads, detergent and / or diapers) and 34 packs of distributed clothing

7 implemented projects

3 studies on gender equality

1 criminal complaint

1 CNCD petition

Over 60 media appearances

Over 2,000,000 social media reach

About 50,000 followers of social media pages

PRIORITY AREAS OF ACTION AND STRATEGIC OBJECTIVES

1. Community work

- Ensuring women's access to quality health services.
- Increasing the civic involvement of women and young people in the community
- Developing a violence-free environment for women and girls in the community

2. Advocacy

- Improving the legislative framework on reproductive health and sexual rights
- Effective implementation and improvement of public policies for preventing and combating violence against women and girls
- Improving the legislative framework on work-life balance

3. Activism and awareness

- Raise awareness and inform the public about violence against women and girls
- Raise awareness and inform the public on issues related to reproductive health and sexual rights
- Empowering public stakeholders on women's rights

4. Studies and analysis

- Assuring access for the general public to information about areas of interest of the organization
- Substantiation of public policies in the areas of interest of the organization

IMPLEMENTED PROJECTS

Women during and after coronavirus: Information, Research and Advocacy for Gender Equality

The project started in August 2020, in partnership with the National Agency for Equal Opportunities and the financial support of the Active Citizens Fund Romania. In January, the research "Women's experiences during the pandemic. The state of affairs and recommendations for gender-sensitive post-crisis measures" was launched, standing as a starting point in the development of some public policies that would address the specific experiences of women, so that they could manage the problems generated by the pandemic as efficiently as possible.

Experiențele femeilor în timpul pandemiei.

Starea de fapt și recomandări pentru măsuri post-criză sensibile la gen

Later, a round table with 19 decision-makers was organised, in which we have presented the research and public policy recommendations that FILIA proposes, and 11 of them have signed a commitment of gender mainstreaming in post-crisis policies. Our recommendations were supported by over 700 signatories of a public petition and an open letter to The Government of Romania was sent to draw attention to the importance of gender mainstreaming measures.

ACCESS - Advocacy, Empowerment, Consolidation for Equality in Health and Safety

Starting in March, ACCESS will take place for more than two years. During the first months of the project, we learned a lot about the different issues that women face concerning the rights to safety and health. We managed to conclude partnership agreements with 6 communes from Arges and Ialomita counties and with 5 county authorities. We organized a campaign on the rights to health and safety in which 24 events were held, with 510 participating women, in which we held 12 informative sessions on violence against women and maternal and reproductive health and 12 events on mapping women's issues. We also organized 6 events in order to increase the mobilization of citizens in local advocacy actions, which were attended by 165 women. During this training women learned about the tools and tactics they can use to exercise their rights and ways to put pressure on the authorities (e.g. hearing with the mayor, petition, protest, etc.).

Subsequently, for each community, a few local representatives were designated to accompany us to the town hall for a discussion with representatives of local authorities and FILIA experts to inform them on the identified problems and find possible solutions for solving them together. A total of 38 women and 16 local authorities' representatives participated. The feedback of the participants following the event was a very strong one, as, for many of them, it had been the first time they could talk about their problems with the local decision-makers. We also started a fundraising activity in October, during which we carried out a campaign for encouraging recurring donors, donations for feminist Christmas gifts, 20% sponsorships, respectively donations of 30% of the price of some partner products.

"Together for the safety of women!" - project of multidimensional intervention against gender violence

Coordinated by FILIA and carried out together with the Anais Association, E-Romnja Association, Front Association and Transcena Association, the purpose of the project is to inform and raise not only public awareness, but also the accountability of institutions. Youth information campaigns carried out within the project attracted the support of 13 influencers and 22 young people who posted messages on domestic violence. To gain the attention of the authorities, we organized the Together for the Safety of Women March in front of the Government.

We also provide victims and the public with useful information in crisis situations. The partner NGOs made a map of Gender Violence which reflects the situation in Mizil, Valea Seacă and Giurgiu, based on which they organized meetings with the competent authorities. In Valea Seacă, workshops with women and girls and a workshop of raising the awareness of men were held.

Workshops with students were organized in Mizil and a theatre play was prepared to be staged. The required data has been collected for the report on victim services and their funding, to be completed and published in 2022. Not only for raising the accountability of the authorities, but also in support of the victims, we have identified persons who had suffered from lack of services or appropriate intervention, after which we will take legal actions against the guilty institutions. So far, we have filed complaints against the Local Councils and the DGASPCs Sector 1 and Tulcea. Finally, in order to develop our capacity, we have developed a fundraising strategy that we will continue to follow.

Making women's voices be heard! - Part two

In 2021, we continued to work with women's initiative groups and youth from Valea Seacă, Bacău. We organized a new training of the mobile team in the community for the intervention in cases of violence against women and girls, as well as meetings at county level with the authorities involved in the cases of violence against women to identify problems and solutions for local interventions. We reported several cases of violence to the authorities, as well as cases of poor case management by local authorities. We supported the reporting of a case of sexual assault of a minor by accompanying the beneficiary and her daughter at the Institute of Forensic Medicine, General Directorate of Social Assistance and Child Protection and the Police Department.

We also provided support in court for three cases identified among the beneficiaries: a case of domestic violence, a case of contesting the filiation towards the mother and a case of deception regarding complicity in tax evasion.

Screening for Cervical Cancer and Early Treatment - SCCUT

In 2021, we provided support to approximately 1,400 women in rural areas in order to identify the risk of those insured with the risk of losing insurance, the ways in which the uninsured can procure medical insurance, and information about reproductive health and their rights as patients. We also accompanied several women for further investigation and treatment of non-cancerous, pre-cancerous and cancerous lesions.

Promoting Gender Equality in Sports - PROGRESS

Coordinated by the Maltese Football Federation, in partnership with the Norwegian Football Federation, the Football Federation of North Macedonia, Centrul FILIA, TREK Development and the University of Modena and Reggio Emilia, the project aims to improve women's access in decision-making positions in the field of sports. In 2021, we conducted with our partners exploratory research on gender inequalities in sports. The results of this research constituted the basis of a study that will be published early next year. We are going to further develop a gender mainstreaming tool that sports federations can use to improve gender equality policies and procedures (especially regarding the increase in the number of women at decision-making level). In addition, we will create a training package focused on the elimination of gender stereotypes in sports and we will train staff within federations, who will further deliver the training internally.

OTHER ACTIVITIES

Network for Preventing and Combating Violence Against Women (V.I.F. network)

We have formulated a communication to the Committee of Ministers of the European Court for Human Rights on the cases of I.C., E.B., M.G.C. v. Romania, following which the Romanian state is monitored by the ECHR regarding implementing effective measures in cases of sexual violence. We have published and analysed annual statistics on domestic violence collected by the General Inspectorate of the Romanian Police. Following the publication of the Judicial Inspection Report on the practice of prosecutor's offices and courts in investigating and resolving cases concerning sex offenses with minor victims, we got involved in consultations organized with representatives of Parliament to support the introduction of the minimum age limit of 16 years for consent in cases of sexual offenses against minors.

On June 17, 2022, One World Romania Festival, the Sensiblu Foundation and Centrul FILIA organized the debate "Challenges in the intervention of professionals for the safety of women and girls in cases of domestic violence", which welcomed, among others, Laura Andrei (Judge at the Court of Appeal), Radu Togan (Prosecutor, Prosecutor's Office attached to the District 6 Court of Bucharest), Claudia Bencescu (Undersecretary of State, MIA), and Luminita Popescu (Secretary of State, ANES), as participants. We facilitated the connection between the embassy group formed in support of preventing and combating gender-based violence and the Network.

In autumn, we organized the annual public event "March Together for Women's Safety", which, because of the COVID19 pandemic, took the form of a flash mob with 33 representatives of the member NGOs in the Network, representing the number of women killed in the first 8 months of the year. Moreover, we ran an online campaign on the occasion of the 16 days of activism. This campaign was financially supported through the Active Citizens Fund program, the project "Together for the safety of women!" - project of multidimensional intervention action against gender violence. Twenty embassies and the Representation of the European Commission in Romania supported our approach. The main demands were the adaptation of the assistance and counselling services for women to the difficulties and risks caused by the pandemic, funding from the local budgets of the social, public and non-governmental services necessary to survivors of violence and communities and the adoption of legislation on implementation of an aggressor surveillance system using electronic bracelets.

Following the flash mob, we coordinated the organization of three debates for students, future specialists, who will come in contact with the victims of domestic violence. The debates were: The role of psychological and social support for the survivors of domestic violence - speakers: Iolanda Beldianu and Vasile Moldovan (experts from the VIF Network), Challenges in instrumentation and solving cases of domestic violence and sexual violence - Arina Corsei Vultureanu - Prosecutor, the Prosecutor's Office attached to the District 2 Court, Laura Andrei - Judge at the Bucharest Court of Appeal and trainer at the National Institute of Magistracy and Challenges in police intervention in cases of domestic violence within the Police Academy. In these debates approximately 130 students participated.

We sent an open letter to Prime Minister Nicolae Ciucă through which we called for the adoption of effective measures for the safety of women, such as the operational electronic surveillance system of domestic aggressors, the development of a multi-annual financing program from the state budget for the development of services for victims of domestic violence, the obligation of standardized programs for working with domestic and sexual aggressors.

Reproductive Rights

Between January and May 2021, we collected data through qualitative and quantitative methods from most hospitals in Romania that have an obstetrics-gynaecology section. From the official answers of the 171 hospitals, we have found that:

- 59 are performing terminations of pregnancy upon request, 69 communicated that they did not do it at all, and medication abortions are available in nine hospitals.
- In five cities we were told that there had been situations of abortions performed through empirical, non-medical methods: Bucharest, Constanța, Sibiu, Motru and Segarcea.
- There are discrepancies between the official response of the hospitals and their response when contacted by telephone.

In March 2021 we protested in front of the Ministry of Health for ensuring access to abortions on request. We were called for consultations and later attended one of the meetings of the working group for drafting the National Reproductive Health Strategy. We continued the advocacy work in the autumn of 2021, after we found that less and less hospitals offer this service and we sent to the Ministry of Health addresses, points of view and recommendations. In the meantime, we started collaborating with the Abortion Support Network, an international support network to offer an alternative to women who can no longer access services of termination of pregnancy on request in Romania.

We are also in contact with the International Planned Parenthood Federation and European Parliamentary Forum for Sexual and Reproductive Rights. We adopted a short film at One World Romania about abortions caused at home, in inappropriate environments, in France during the time when interruptions of pregnancy were illegal and we organized a debate on this topic.

Collaboration with public institutions and Embassies in Bucharest

FILIA's representatives participated in several conferences and round tables this year on the topic of preventing and combating violence against women, access to reproductive health and gender equality, including: the round table organized by the Council of Europe Expert Group delegation on action against violence against women and domestic violence (GREVIO); Equality Generation Forum, organized by the French Embassy in Romania, with the support of UN Women; Gender Perspective in the context of the COVID-19 pandemic, by the Bureau of the European Parliament in Romania, and Assault on sexual and reproductive health under COVID19, organized by Human Rights Watch.

In March, we participated at the round table "Women's Rights: Between Campaigns anti-gender and pandemic ", presented and analysed Romania's situation at the launch of the platform for equality between women and men of the Francophone Network for equality between women and men, event organized within COING (Conference of Francophone International Non-Governmental Organizations) and we took part in the event organized by CAWTAR (Center de la femme arabe pour la formation et la recherche / Center of Arab Women for Training and Research) in partnership with the Francophone Network for equality between women and men within The sixty-fifth session of the Commission on the Status of Women (CSW65) - webinar "Governance between Transformational Leadership and Gender Violence".

We also continued our collaboration with the National Agency for Equal Opportunity and participated in consultations with several decision-makers (mayors, deputy mayors, members of the government, and members of Parliament) on women's rights. Centrul FILIA was mentioned in the Report on the respect of human rights in Romania updated in 2021 by the State Department of the United States of America.

RAPORT. Efectele pandemiei asupra femeilor: a crescut cu 50% numărul celor care au intrat în șomaj: „Nu aveam papuci la copii. Trebuia să aștept până la alocație”

De **Cristina Radu**, Miercuri, 10 februarie 2021, 07:30. Ultimul update Miercuri, 10 februarie 2021, 21:45

O cercetare a Centrului FILIA arată că femeile au fost mai afectate de pandemia de COVID-19 decât bărbații și au înfruntat riscuri mai mari: cazurile de violență domestică s-au intensificat, accesul la serviciile medicale a fost mai dificil, iar multe femei s-au bazat pe alocațiile co-

să-și întrețină familiile, pentru că și-au pierdut locurile de muncă.

Record înspăimântător în România. 426 de femei și tinere minore, ucise în ultimii opt ani, în familie. 33, ucise anul acesta

Lupta contra violenței împotriva femeilor din Europa, îngreunată de pandemie

O treime dintre femeile din România au fost hărțuite sexual, iar 40% dintre ele susțin că au fost martore la astfel de scene, pe stradă sau chiar în instituțiile de învățământ superior, arată datele unui studiu. Acest studiu le induce starea de frică și nesiguranță atunci când ies din case. Femeile sunt victime sigure ale hărțuirii sexuale, datele studiului și se...

Ioana are 29 de ani și este dintr-o comună din județul Iași. Are opt copii, cinci dintre aceștia fiind într-un centru de plasament încă de dinaintea pandemiei, iar un altul la spital.

Pe Ioana am cunoscut-o prin intermediul Părintelui Damaschin și a asociației pe care acesta o conduce, Glasul Vieții. În prezența unei asistente sociale din cadrul fundației, aceasta vorbește despre abuzul fizic prin care a trebuit să treacă. Agresorul, soțul ei, este un bărbat pe care-l cunoaște de când era mică.

„A fost greu. Nu s-a mai dus la muncă din cauza pandemiei. Cred că și din cauza neajunsurilor, s-a descărcat pe mine, nu-mi explic din ce cauză a fost așa cu mine”, a povestit victima pentru Europa Liberă.

Odată cu pierderea locului de muncă, violența s-a amplificat în gospodăria celor doi. Ioana povestește cum a fost bătută cu parul, fugărită, cum agresorul a aruncat cu lemnele după ea, iar lista actelor de violență continuă.

"Tu, ca victimă, pleci în miez de noapte, uneori dezbrăcată, în picioarele goale, cu copil, fără copil, ajungi la un centru public și ai nevoie de dosar cu șină": Andreea Bragă în dialog cu DW despre violența domestică.

Andreea Bragă are 35 de ani, este feministă, membră a [Centrului FILIA, organizație neguvernamentală feministă axată pe cercetare, advocacy, activism și lucrul în comunități](#), deține un doctorat în științe politice la Școala Națională de Studii Politice și Administrative (SNSPA) din București și este interesată de prevenirea și combaterea tuturor formelor de violență împotriva femeilor și fetelor, precum și de promovarea unei abordări feministe incluzive care să țină cont de interesele diverse ale femeilor.

DW: Statisticile actuale ale Națiunilor Unite arată că, la nivel global, una din trei femei este

FINANCIAL DATA

TOTAL INCOME	934.890,30 lei
TOTAL SPENDING	804.510,31 lei
PROFIT	130.379,99 lei

SUPPORT US!

Thank you for supporting us so far. Over the last years, we managed to build a community – a community of people that believe in gender equality, that women to be safe and to have their voices be heard.

If you want to support FILIA's activities and want to be part of our community, we are waiting for you. You can either be a volunteer at our office, you can help online or want to offer your services pro bono. YOU have an important role for us. With you, you can gain experience and you can promote and sustain women's rights and gender equality. Get involved and help us make women's voices to be heard!

With your support, we will continue supporting vulnerable women, we will continue to raise awareness on topics related to feminism and women's rights, and we will continue to fight for your rights

Sadly, we cannot sustain this fight by ourselves. Any donation, no matter how small, can help us continue making women's voices be heard.

You can help us through a one-time or recurrent DONATION or through SPONZORSHIP.
