

# ANNUAL REPORT 2022

#WEMAKEWOMENSVOICESHEARD

# **CONTENT**

- **About FILIA Center**
- **Year 2022 in figures**
- **Implemented projects**
- **Other activities**
- **Presence in the media**
- **The team of FILIA Center in 2022**
- **Financial Data**
- **Join us!**

**FILIA Center is a feminist organization that makes women's voices heard, through direct work in communities and advocacy, activism and awareness, studies and analysis activities.**

We want a solidary society in which the diverse rights and needs of women are respected and which offers equal opportunities to all people.

## YEAR 2022 IN FIGURES:

- **6.357 beneficiaries** within the carried-out projects
- **Over 20.000 km** traveled in our work with young people and women in vulnerable communities
- **6 published studies**, including the first Barometer on gender violence published in Romania in the last 20 years
- **15 projects** carried out in the field of equality, women's health and prevention of combating gender-based violence
- **150 delivered packages** with hygiene products, food and clothes
- **1 truck of two tons** with first-hand supplies sent to Ukraine
- **1 national campaign** regarding violence against women
- **11 contributions** to public policies and initiatives to monitor legislation
- **4 complaints** sent to the National Council for Combating Discrimination and to the Prosecutor's Office
- **Over 4.7 million reach** on social media and over **74 thousand followers** in our online community
- **Over 400 appearances** in the media through which we had positions on women's health, safety and through which we sanctioned the sexist speech in the public space
- **115 courses, trainings and workshops** on safety and health of women and girls
- **1 parliamentary group** on women's rights
- **Two facilities** related to violence and safe access to abortion.

## YEAR 2022 IN WORDS

Beyond numbers, 2022 was **a challenging year, but at the same time it was full of satisfaction**. Starting with the invasion of Ukraine, we always had to be on alert, rethink and adapt our activity so as to include refugee women in our advocacy and information activities. We had a partnership with two organizations from Ukraine, "Way Home" and "Women's Center", with which we sent first-aid packages and helped relocate to Romania or transit the country for refugees. Together with the "Anais Association" and the "Independent Midwives Association" and with the support of "Code4Romania", we have developed a platform that contains answers about health, safety and social and education services for refugees.

We have grown our team and along that our visibility and impact. We have published the first nationally representative research on gender-based violence in 20 years. We have set up the first informal group in Parliament for the rights of women and girls with representatives from all parliamentary parties. We continued working in communities, where we have organized workshops on women's health and safety, but also on active citizenship. We organized trainings for local and county authorities, students, employees of different companies and activists.

We constantly monitored both the activity of public institutions and politicians, as well as the statements of public figures and sexist advertising campaigns and we sanctioned them.

We traveled from the United States to the Republic of Moldova to learn from the work of our colleagues and to present the situation in Romania. **We have succeeded in all this with the help of funders, sponsors, donors and the FILIA community. And for that, we are deeply grateful.**

## **PRIORITY AREAS OF ACTION AND STRATEGIC OBJECTIVES**

### **1. Community work**

- Ensuring women's access to quality health services
- Increasing the civic involvement of women and young people in the community
- Developing an environment without violence for women and girls in the community

### **2. Advocacy**

- Improving the legislative framework on reproductive health and sexual rights
- Efficient implementation and improvement of public policies to prevent and combat violence against women and girls
- Improving the legislative framework on work-life balance

### **3. Activism and awareness**

- Increasing public awareness and information on violence against women and girls
- Increasing public awareness and information on issues related to reproductive health and sexual rights
- Empowering public actors on women's rights

### **4. Studies and analyses**

- Facilitating access for the general public to information about areas of interest of the organization
- Substantiation of public policies in areas of interest of the organization

# IMPLEMENTED PROJECTS

## ACCESS - Advocacy, Capacity, Strengthening for Equality in Health and Safety

In the last two years, we have worked with women from 6 rural communities in Argeş (Valea Mare Pravăţ, Aninoasa and Bughea de Jos ) and Ialomiţa ( Borăneşti, Ion Roata and Munteni-Buzău ). In 2022 we set out to come up with real and applicable solutions to improve the intervention of local and county authorities in the field of women's safety and health, by building a system of collaboration between authorities and developing examples of good practice that can be replicated at national level.

We organized 4 round tables during which we discussed access to contraceptive services, pregnancy monitoring and access to screening services, as well as issues related to the intervention and roles of services in the field of domestic violence.

Starting from the experiences shared by over 500 women from the 6 communities we've met with and from the obstacles signaled by local and county authorities, we developed 2 methodologies: one on access to contraception, pregnancy monitoring and screening services and one on the coordinated intervention of professionals in cases of domestic violence. Then, we organized a training in order to apply locally the 2 methodologies attended by people from DGASPC, IPJ, DSP, representatives of town halls.

Subsequently, we carried out a watchdog campaign whose main purpose was to monitor the implementation of the methodologies created. In this regard, we organized field visits (both locally and at county level) and discussions in communities. We organized a training for activists on community organization and gender mainstreaming approach attended by 15 people.

## „Together for women's safety!” – multidimensional intervention project against gender-based violence

Coordinated by “FILIA” and developed together with the “Anais Association”, the “E-Romnja Association”, the “Front Association” and the “Transcena Association.” The project aimed at multidimensional intervention to prevent and combat gender-based violence. Throughout the project we engaged together with the VIF Network in actions of local and central advocacy, in actions of awareness, monitoring, empowerment and work in communities, but also research and activism.

The network filed a petition with the CNCD requesting that the degrading and discriminatory nature of virginity tests carried out in forensic units in the country be found, and also seven administrative complaints against several local authorities regarding the lack of services for victims of domestic violence. We developed advocacy groups in six counties and submitted memoirs to DGASPC and the County Councils requesting the financing of services to prevent and combat domestic violence.

Within the project, we've carried out a campaign for women's safety dedicated to the general public. We published the petition "We are tired of empty words, we want social services!", through which we asked for the financing of prevention programs and adequate services for VDG survivors.

The March for Women's Safety took place in Bucharest and six other cities under the slogan "We are tired of empty words, we want social services!". This was also the largest and most visible march against gender-based violence ever organized in Romania, with over 6,000 participants across the country.

On November 25, we launched the fundraising and awareness campaign "Some laundry should be washed in public", showing that violence against women is not a private matter between the victim and the aggressor, but it is „dirty laundry” which we must wash throughout society: couples, family, friends, witnesses, institutions.

## TRUST: Young People Responsible for Safe and Fair Universities

In 2022 we started the project "TRUST: Young People Responsible for Safe and Fair Universities" in partnership with "ANOSR" and "Pitesti University". We set out to meet the needs of students through information, training and advocacy. We conducted an online campaign aimed at raising public awareness of terms such as gender discrimination and sexual harassment.

We conducted the largest study on sexual harassment in Romanian universities: we analyzed 85 codes of ethics of public and private universities and the statistical situation of cases registered in the last 5 years.

The study was launched during a round table attended by 33 relevant actors to whom we've presented the recommendations to universities.

We held 5 information and awareness sessions on sexual harassment and the responsibilities of governing bodies at university level with over 100 students from across the country. We formed the "University Safety Network" and created "The Allied map". We met with 468 students from 12 high schools in Buzău, Giurgiu and Călărași counties to discuss sexual harassment. We also moderate the Voice Against Student Discrimination initiative group, at the University of Bucharest that carries out awareness and advocacy activities on the subject of sexual harassment.

## VioGen – RoJust

This project was coordinated by the "National Agency for Equal Opportunities between Women and Men" in partnership with the "FILIA Center", "The Anais Association", "The Transcena Association" and "The Grado Association".

The FILIA Center coordinates the awareness campaign on the subject of gender violence, campaign called "We are all responsible". Within it, we have made radio-TV spots, offline displays, social media posts, as well as an education subpage based on a series of "case study" - 3 situations of gender violence and the roles that relatives play and witnesses to spread or stop the violence.

At the same time, regarding the advocacy activity, we have monitored and documented the existing gender prejudices by analyzing some motivations of the courts in cases of gender violence. We have contributed to the development of a tool for monitoring potential cases of discrimination in victims of gender-based violence's access to justice.

DESPRE PROIECT

MARIA

### Suntem toți responsabili. Hai să oprim violența de gen.

CONSTELAȚIA VIOLENȚEI DE GEN

Nu există om care să nu fi contribuit în vreun fel (direct, indirect, conjunctural, conex, pasiv) la violența de gen pe care o vedem peste tot. Că ești agresor inconstient, prieten/ă care nu crede, coleg care minimizează, enabler direct sau pasiv, gaslighter sau, pur și simplu, ai zis la un moment dat bancuri cu blonde, fiecare dintre noi este responsabil în violența de gen și bineînțeles, fiecare din noi poate face ceva în privința asta.

NAVIGHEAZĂ SPRE DREAPTA PENTRU A AFLA MAI MULTE >>

Maria  
Soțul ei face o criză de gelozie, țipă la ea și aruncă o vază în perete. Oare cei din jur o susțin?

FILIA TRANSCENA Anais Grado

## Screening for Cervical Cancer and Early Treatment – SCCUT

This project was coordinated by the “National Institute for Mother and Child Health” in partnership with the “FILIA Center”, the “Sastipen Association” and the “Renaissance Association”. “FILIA” made 49 trips to localities in Southern Muntenia. We accompanied the mobile unit and informed about the importance of medical insurance, the importance of preventing cervical cancer, methods by which they can prevent its occurrence or its aggravation. Individual discussions took place with women in the target group to identify reasons for not being medically insured or to inform them of the need and importance of the acquisition and/or maintaining the status of medical insurance and identifying the best approach for each of them.

The FILIA team accompanied to the Polizu Maternity 18 uninsured women who were positively identified in HPV. We facilitated the dialogue between them and the medical staff, we offered both emotional support and support in identifying the methods by which they can acquire the status of medical insured.

## Stand UP against street harassment!

In 2022 we joined the "Stand Up against Street Harassment" campaign supported by L'Oreal and Right to Be. The launch event took place on November 1 at Băneasa Railway Station where we held a demonstration training.

Stand Up is a program created to prevent street harassment, a training designed to educate witnesses to recognize an act of harassment and to react. At the base of the training is the methodology of the 5D (distraction, delegation, documentation, after harassment and direct intervention), an intervention strategy developed by "Right to be" both for people who are witnesses to street harassment and for people facing street harassment.

During November-December, we organized 38 trainings with the participation of 2252 young women and men from high schools and universities. In order to increase the degree of information and awareness on the subject, we had 4 televised appearances on Vorbește Lumea, La Măruță, Teo Show and Neatza cu Răzvan și Dani where we talked about what it is and how we can combat street harassment Răzvan and Dani where we talked about what it is and how we can combat street harassment.

## Abuse is not love!

We started collaborating with YSL Beauty within the program Abuse is not love! The program debuted internationally 3 years ago and was focused on educational trainings based on the 9 signs of intimate violence. In 2022, we had trainings with YSL Beauty's internal team on domestic violence.

## Support for refugees from Ukraine

Since the first months after the start of the war, we have been involved in supporting Ukrainian refugees in Romania. In March we started a fundraising campaign in the form of an auction - several artists, craftsmen and people in our community donated items, and the funds were redirected to two organizations in Odesa and Kyiv. In April, we sent two tons of essential products to Ukraine, with the support of ERIKS.

Later, through donations, but also with support from OXFAM (May-August 2022) and the Center for Reproductive Rights (October-December 2022), we managed to support more than 260 women and children with basic food & hygiene products, shelter, access to reproductive health services, information on services for survivors of gender-based violence, and services and products specific to children and babies. We contributed to research on the issues and needs of refugees in four countries, with a focus on SRH, GBV and the obstacles faced by civil society organizations.

With the help of CODE4ROMANIA we built an online platform to support refugees - <https://womencenter.info/ro>. Following the requests received from the platform, we intervened with solutions in over 60 cases.

## "Knowledge is Power!" - Research and advocacy for improvement of gender violence policy

The project was implemented with the support of the Embassy of the Federal Republic of Germany and contributed to strengthening advocacy activities in the field of women's and girls' rights, as well as increasing the level of knowledge regarding perceptions and attitudes regarding gender-based violence.

As part of the project, we analyzed the public statements and parliamentary activity of all senators and deputies to identify allies on the promotion of women's rights and gender equality, and we had discussions with 44 deputies and senators on the health and safety of women and girls. We established the first informal Group for Women's Rights at Parliament level, which includes 30 deputies and senators from PSD, PNL, USR, Reper and UDMR.

We have centralized and analyzed statistical data at the prosecutor's office level in 2021 regarding some crimes against sexual freedom and integrity with minor victims ([link here](#)), as well as statistical data regarding minor mothers registered in 2021 ([link here](#)).

We published the Gender Violence Barometer. Romania 2022: representations, perceptions and we launched the research results in a conference attended by over 80 representatives of the Parliament, Government, Embassies, civil society and the academic environment.

## GOALSCORE: Fighting domestic violence through football

The project is implemented by the Malta Football Association, together with two other national football associations: the Romanian Football Federation and the Portuguese Football Federation and 3 other associations dealing with gender violence and promoting gender equality: FILIA Centre, Malta Women's Lobby (Malta) and APAV - Portuguese Association for Victim Support (Portugal).

The project aims to combat violence against women, raise awareness and promote institutional support for gender equality through football. Together with partners we aim to create and implement a methodology for football coaches that will allow them to define and identify abusive, coercive and disrespectful behavior towards female athletes.

In 2022, the project's activities focused on the development of research on 1) the knowledge and attitudes of trainers regarding gender-based violence and 2) the identification of good practices regarding combating violence against women

<https://projectgoalscore.com/>

## PROGRES: Promoting Gender Equality in Sports

Coordinated by the Maltese Football Association, in partnership with the Norwegian Football Federation, the North Macedonian Football Federation, FILIA Centre, TREK Development and the University of Modena and Reggio Emilia, it aims to improve women's access to decision-making positions in sports. We have launched a study that looks at gender inequality in several European sports federations, how inequality looks in different sports, and what actions can be taken to eliminate these discrepancies. We have created a gender mainstreaming guide for the management of sports organizations with the aim of providing information, advice and concrete recommendations to achieve equality between women and men in the sports sector.

## UP&UP: Upscaling trainers and educators' competencies on gender based violence to Upscaling awareness among young people against violence

The project aims to inform and raise awareness of gender stereotypes, how they lead to gender violence and the development of skills to recognize the various forms of violence and to respond to them in the school environment. Together with our partners, we have developed a training package dedicated to teachers, available for free on the [www.upanduperasmus.eu](http://www.upanduperasmus.eu) platform, which contains 10 video materials covering various topics: from the national and European legislative framework regarding gender-based violence to definitions and forms of violence, the connection with gender stereotypes and discrimination. 14 teachers from "Nicolae Bălcescu" Ploiești Secondary School tested the training package and gave us feedback.

## The women's initiative groups from Valea Seacă and Valea Mare Pravăț

In 2022, we continued the work with the initiative groups from Valea Seacă and organized meetings with young people and women from the villages of Pălămida, Valea Seacă and Cucova. In our meetings we addressed topics such as: violence against girls and women, gender roles and women's sexual and reproductive health.

We provided legal assistance to a family in a court action challenging maternal filiation. Ionela lived without documents until she was 35 years old. The first borns, two boys, like their mother, without documents. In 2010 when she gave birth to a girl, Ionela used her sister-in-law's report card at the hospital so that her daughter could have documents. Although the daughter lives with her family, in the documents she appears as the daughter of the mother's brothers-in-law. We went with Ionela and her daughter to the Court, we went to Iași to do the forensic DNA examination. In August, we obtained the decision of the Bacău Court admitting the girl's biological parents.

In December, after 8 years of activity, we decided to leave the community of Valea Seacă, knowing that the girls and women were now much more confident, self-assured and that they have gained enough courage to address the problems they identify.

Ever since May 2021, back when we first started the activities of the ACCES project, we noticed the bravery and open-mindedness of the women in Valea Mare Pravăț. In 2022 we decided to lay the foundations for a civic initiative group: The "Femeile schimbă destine (Women change destinies)" Group in Gura Pravăț. We continued holding meetings in order to build confidence among the group members and to plan actions to tackle the issues identified inside the community.

# OTHER ACTIVITIES

## **The Network for Prevention and Combating of Violence Against Women (V.I.F. Network)**

V.I.F. Network's first advocacy priority was determining the minimum age for sexual consent. Thus, we sent two open letters addressed to the members of the Parliament requesting the approval of the bill. We contributed to drafting the V.I.F. Network's point of view regarding the Order of Protection Bill proposed by the Ministry of Justice, and we attended public consultations concerning the subject. We participated in the meetings of the Crime Victims Support Group, coordinated by the Ministry of Justice. We took part in drawing up the Network's contribution to the 4th cycle of UPR.

## Reproductive rights

We carried out advocacy, activism and research activities in the field of reproductive health. On March 8, we had an intervention regarding refugee women's access to reproductive health care during the protest for Romanian women's rights. Moreover, we held several meetings with other organisations working within the field of reproductive health, as well as with representatives of the Parliament, SOGR, CMR, OMS.

Together with the Independent Midwives' Association, we sent an open letter concerning the reimbursement for abortions on-demand, especially for certain sectors of vulnerable women. The letter was signed by over 240 international and national organisations.

Also together with IMA, we created an interactive installation which explored the journey and obstacles that women in Romania faced (during the 770 Decree period) and continue to face when accessing on-demand abortion procedures. The installation was completed by over 70 members of the Parliament, ambassadors, MEPs, representatives of the central public administration, health experts, journalists, and representatives of civil society.

In 2022 we continued to offer support to people who had contacted us after not being able to access on-demand abortion services, and we continued to raise awareness about the issue via social media platforms. To the process of spreading awareness also contributed dozens of our media appearances about the access to safe abortion services.

## **Collaboration with the public institutions and Embassies of Bucharest**

This year, FILIA representatives participated in several conferences and round table discussions on the topic of prevention and combating of violence against women, access to reproductive health care, and gender equality, among which we mention: the International Conference on women's representation in politics, organised by the Romanian Senate, under the patronage of the Romanian President. Furthermore, we took part in multiple meetings with experts, politicians, and representatives of the Embassies of the United States of America and the Federal Republic of Germany. We have received the award for the entire activity of the organisation at Gala Binelui, organised by the Ministry of Family, Youth and Equal Opportunities. We held several events and meetings with the Parties' women organisations, as well as with members of the Parliament, on the topic of gender equality.

We continued collaborating with the National Agency for Equal Opportunities and we participated in consultations with several decision-makers (mayors, vice mayors, members of the Parliament, members of the Government) regarding women's rights. FILIA Centre was mentioned in the U.S. Department of State's Report on Human Rights Practices in Romania.

We took part in the national and regional working groups for assisting refugee women from Ukraine (coordinated by OMS and UNHCR), focusing on preventing violence and ensuring access to reproductive health services. Additionally, we held working meetings with the World Health Organisation concerning the refugee women's access to abortion procedures and other reproductive health services. In September 2022 we participated in a conference organised in Prague, within the "Fragile like a bomb" Festival, on the topic of Romania's lack of access to abortion services.

## Other activities

In regard to other activities concerning sexual harassment and gender discrimination, we participated in an awareness campaign along Fashion Days, a storytelling event with DOR (Decât o Revistă) and Kaufland Romania, as well as a live event with TikTok. Moreover, our executive director, Andreea Rusu, took part in a exchange programme in the United States of America through the Open World programme, in a planning of feminist activists in Eastern and Central Europe financed by VOICE and RARE School of Advocacy, organised by Hertie School. Our colleague, Adela Alexandru, attended the International Conference on prevention and combating of domestic violence, second edition, held in Chisinau, organised by the National Coalition "Viața fără violență (Life without violence)."

**De ce nu vorbim despre hărțuirea sexuală din mediul academic? „Când autorul e un profesor cunoscut și apreciat, șansele ca o victimă să vorbească scad considerabil” – raport**

De Laurențiu Ungureanu, Vineri, 29 Iulie 2022, 17:00 . Ultimul update Vineri, 29 Iulie 2022, 19:37

Pregnancy crisis centres (PCCs) first appeared in the US in the 1960s and gained popularity after the Roe v Wade ruling. They promised counselling to women with unplanned pregnancies – as an alternative to abortion. However, they have been criticised for not **advertising their religious affiliation or stating their anti-abortion stance**, leading to them being mistaken for abortion clinics. The medical information provided by PCCs has often been found to be counter to medical consensus.

“They try to discourage and prevent you from getting an abortion, either by shaming or by misinformation,” says Andrada Cilibiu from Centrul Filia, a women’s rights organisation. “The information they provide usually doesn’t have a medical basis. Instead they use fear.”

📷 Women's rights activist Andrada Cilibiu has collected abortion data from 136 public hospitals as part of research for feminist organisation Centrul Filia. Photograph: Ioana Moldovan/The Guardian

# SUPPORT US!

We thank you for all the support we received up until now. Over the past few years, we managed to build a community – a community consisting of people that believe in gender equality, that wish for women to be safe and able to make their voices heard.

If you wish to further support FILIA's activities and be part of our community, we are eagerly waiting for you. Whether you want to do volunteer work at our office, help us online or provide us with pro bono services, YOU play an important role for us. Together with us you can develop your experience and you can contribute to promoting and supporting women's rights and gender equality. Get involved and help us make women's voices heard!

In return to your support, we will also continue to help the most vulnerable women, we will continue to bring in the eyes of the public subjects concerning feminism and women's rights, and we will continue to fight for your rights.

Unfortunately, we cannot fight this fight alone. Any donation, no matter how small, helps us further in making women's voices heard.

You can help us through a single or recurring DONATION or through a SPONSORSHIP:
